NEWS / IDEAS / HOT TOPICS / TRENDS

Welcome Home!

After more than 10 years of deliberation, and nearly 12 months of construction, we're proud to finally be able to call Abbotsford home. The building of our new office has been an exciting adventure, and one that could not have been completed without the countless individuals who've poured their time, creativity, and skills into making this WestGen dream a reality.

This building has not only been designed as a more efficient place of business through which we can serve our customers better, but also as a meeting place and hub for all our WestGen members

and owners to enjoy. This is your building; built for your future, and something we hope you'll be proud of. It's truly everything we'd hoped it would be, and now we're eager and ready to proceed with Phase Two of the building process — the barns!

In celebration of the rich history behind us and the exciting future that lies ahead, we hope you'll be able to join us at the Grand Opening that we'll be having at our new home at 1625 Angus Campbell Road, Abbotsford, BC, on Tuesday, August 16th, at 10:30am. In addition to allowing our members and customers a chance to explore our new home, this event will be an opportunity for hundreds of Western Canadian farmers from far and wide to mingle with our partners and neighbours.

There will be food, fun for both adults and children, and a few surprises that you won't want to miss! We hope we can count on seeing our WestGen members, past and present staff, and partners there as we celebrate and commemorate the start of this next chapter in WestGen's story.

If you are planning on attending the Grand Opening on August 16th, please RSVP to **grandopening@westgen.com**.

Come for your tour at the Grand Opening!

New Applications for Heitime

SCR has introduced several new powerful applications for its Herd Intelligence solutions.

The new capabilities provide you with additional timely and actionable insight into your cows' reproductive and health status. With the ability to make better-informed decisions about more aspects of your herd and farm management, you can further improve productivity, reduce costs, and gain more control, for more sustainable dairy farming.

Available with some existing and all new SCR Heitime® Pro, and Heitime® HR-LD systems, and integrated with the SCR HealthyCow24® solution, the new applications enable you to get even more value from your SCR system.

REAL-TIME GROUP ROUTINE

Real-time updates highlight unusual activity or rumination at the group or herd level pointing to issues like spreading illness, group panic, stress, and more.

GROUP CONSISTENCY

Monitors and analyzes long-term rumination trends, and highlights any irregularities at the group level, like feeding changes, opening a new silage bunker, adjusting the ration, infiltration of rotten feed, and more.

HEAT

Heat Index - An enhanced heat detection tool that is based on activity, rumination curve, heat length and time from the previous cycle.

Pregnancy Probability Application - Calculate the probability of pregnancy and possible miscarriage for all post-AI cows.

PROCALVE™ APPLICATIONS

The ProCalve suite of applications includes two alerts that help you safeguard the health of your cows in the critical and sensitive time around calving:

Pre-Calving Distress Alert - Gain essential insights on cows experiencing unusual stress during calving

Post-Calving Distress Alert - Minimize the impact of a transition disease with early warning of a post-calving problem

Contact your WestGen Genetic Advisor today to learn more about how to make every cow count on your dairy!

New Mid-round Genomax Additions

As new bulls reach puberty and begin semen production, more and more we find ourselves able to offer some very enticing new bulls between official proof releases. As much as possible we release these bulls at the mid-point between proof dates when the intention is to make them fully available. In addition to these, there are many more that become available, but need to be ordered first. Here then, are some of the new bulls on offer:

Westcoast RANDALL – Loptimum x Numero Uno – This is a bull we have been anxiously waiting for as he is simply the highest LPI bull available anywhere. With a rating of 3446 and a DVG LPI of 3618, he is off the charts in terms of the extent to which his DNA test exceeds his parent average – estimated at 400 LPI points! He is that all-rounder with high production yields, excellent Type improvement and very strong Health and Longevity numbers, including a prediction for extremely easy calving. Sired by Loptimum (a Shotgun son, who in turn is a Snowman son), he is also a bit different pedigree-wise. In summary if you select for LPI this is a bull you need to consider.

Dam: **EDG RUBY UNO RIZA**
VG-87-2YR-CAN

Dam: **VIEW-HOME MCC FOUND**
VG-87-2YR-CAN

Westcoast TICKET – Silver x Tango – An early Silver son, Ticket is another Robot-Ready option that offers a balance of Type (+12) and Production (+90 F, +62 P) as well as a balance of LPI (3265) and especially TPI (2659). He's an easy-to-use bull that is easy to incorporate into any breeding program.

Claynook FELIX – Supershot x McCutchen – A terrific new Robot-ReadyTM option, Felix comes with tremendous Pine-Tree Missy cow family credentials and is well suited for those with robots, and those planning for robots. His 3336 LPI rating is impressive and the Supershot x McCutchen combination seems like a winner too.

Great-Grandam: **CLEAR-ECHO 822**
LAUD 1266 EX-91-5YR-USA 1*

Dam: **SANDY-VALLEY MORGAN**
CALVARY VG-87-2YR-USA

Sandy-Valley COPIOUS – Bombero x Morgan – Another easy sire to use in any breeding program, Copious is a Bombero (Uno) from a Morgan (Bookem) dam. A nice balance of LPI (3234), TPI (2639), Type (+13) and Production (+2215 M, +88 F & +70 P), Copious offers a slightly different pedigree too.

River Dale Dirigent – Wickham x McCutchen – An excellent new Robot Ready option, Dirigent combines the very popular Wickham with the very typey Dabble family. Not surprising then that he is a Type specialist rated +15 for Conformation. Specializing in foot structure and a good option for loin strength and rump angle, he'll make a few nice 4-H calves!

Granddam: **BROEKS DAISY**
VG-85-2YR-CAN 1*

What would you do
with **\$13,980?**

WestGen's 4-H PROMOTION

That's the question 313 dairy 4-H members of clubs across western Canada are asking themselves following receiving funds earned through the 2016 WestGen 4-H Promotion. \$5 from the sale of each dose of 5 popular bulls sold between March 1-May 15th was contributed to clubs. New club shirts and jackets, fitting supplies for the shows, travel to the provincial 4-H show are just some of the items we've been told these funds will support.

So on behalf of each member, we thank each of you that made the choice to support this fundraiser when selecting bulls this spring!

Funds raised by province:

BC \$4780
AB \$5125

SK \$2250
MB \$1825

The Rewards are there to see...

Following recent events here in Western Canada we start to see more and more results from Boviteq West's IVF program. Those female calves created keep coming to the forefront. It was a pleasure to sponsor a new class at the National Holstein Convention with the creation of the innovative and historic Genomic class. Those involved should be very proud and it was noteworthy that our customers were so successful.

As we move through show age time yet again we've welcomed breeders using our recipient program to make those female show age calves. It is timely to remind that if use of the program is planned please book in early so we can meet all your requirements.

One last thing as WestGen moves into a new era with new office facilities in Abbotsford a few changes start for Boviteq West too. Below you will see that our mailing address and some contact details have changed, however for all other aspects of the business we will still be in Milner. As always we will be welcoming any visitors that wish to see what we're all about.

 GeneBank

BoviteqWest

Boviteq West is pleased to unveil its new look! The re-designed logo reflects the company's close ties to WestGen, with the similar text elements and the signature DNA Helix design to make the connection between the two brands clear. The logo maintains the original colours of Boviteq West to promote brand continuity.

The first 2 GeneBank heifers are being collected and have recently been pictured. You can still sign up! Contact pmeyer@westgen.com

Western Canadian Classic 2016

The 32nd Western Canadian Classic is set to take place from August 23-27th in Brandon, Manitoba. The Keystone Centre and adjoining Canad Inns will serve as the venue for 100 keen dairy youth from across the west to compete for honours in Dairy Science, Fitting & Clipping, Judging, Showmanship and Conformation. The top ranking senior participant will also earn a trip to the European Young Breeders School in Belgium. They'll also enjoy plenty of camaraderie including a fun night and a formal awards banquet.

WestGen is pleased to continue our support of this very unique and highly regarded youth development program. Our full Board of Directors will be in attendance this year as they hold their summer board meeting in Brandon that week. If you're able to make it, we look forward to visiting with you there and can assure that you won't regret witnessing the passion and enthusiasm displayed by our future dairy leaders!

More information is available at www.cowsmo.com/wcc.

Reminder: Request your post-proof SemexWorks Report in August!

SemexWorks is an easy to use, yet powerful tool that empowers you to define your farm economics and the specific needs for your operation from a genetic viewpoint. Compare your farm-specific economic values and ROI by looking at the different genetic options available to meet your needs.

Your WestGen Genetic Advisor
awaits your call!

 **SemexWorks**
A Step Ahead

Purchase Immunity+ sires and receive a valuable coupon for purchase of  checkup, plus a chance to win a **trip for 2 to Australia!**

Summer time is busy time on the farm. With cropping and the focus to create the very best feed for the coming year needing to be worked in to the day-to-day cow care routines, it is easy to understand that the last thing you need is sales people taking up your most limited asset: time. That's where WestGen's summer promotion comes in. Consider making a larger volume purchase from our Immunity+ suite of exceptional Proven and Genomax options, earn a potentially bigger discount for doing so and eliminate the need to spend more time on your genetic plan until after August. You don't need to think about bulls, you don't need to worry about running out of stock and most important, you can focus on other things.

The bonus: we'll provide a valuable coupon toward your first or next purchase of Check-Up and you'll be entered into our draw for a trip for two to Australia next January. Imagine leaving winter behind to enjoy the height of summer down-under all while contented cows back home fill the tank from top feeds you grew and harvested last summer.

June 13 - August 9, 2016

Prize valued at \$12,000!
Includes 2 week trip in mid-January 2017,
accommodation for 2, return flights from
Vancouver, 2-3 meals/day, tours, shows and more!

Visit www.westgen.com/australiacontest to view the itinerary and full contest rules.

Know the **bug** before you use the drug.

On-farm milk testing for fast identification of mastitis causing bacteria. Checkup offers an easy and affordable way to ensure that proper treatment decisions can be made quickly and effectively.

checkup
MASTITIS DIAGNOSTIC TOOL

- effective for high SCC cows, fresh cows and cows with mastitis
- compliments herd testing and in-line SCC mastitis detection
- quickly identifies contagious and environmental pathogens
- proven effective when tested by industry experts against latest microbial technologies
- aids in development of effective treatment protocols and implementation of preventative measures
- results in cost savings and reduced use of antibiotics

Contact your WestGen Genetic Advisor today!

Earn a GIFT CERTIFICATE and a Ballot to win a TRIP FOR 2 TO AUSTRALIA!!!

Valid on purchases made between June 13 and August 9, 2016 on qualifying Immunity+ sires. \$25 coupon for 30 dose purchase, \$50 coupon for 50 dose purchase. Limit of 1 entry per invoice. Draw will be held on August 16, 2016.

Have you ever wondered how your operation ranks against others on key metrics, yet have had a hard time finding a current relevant benchmark to compare it to? DairyTrack is your solution! A powerful herd performance monitoring tool that uses on farm animal data synchronized nightly from the farm management or milking parlor software to the DairyTrack program.

Working with your WestGen Genetic Advisor, targets and triggers can be entered on 40+ Key Performance Indicators (KPIs). Setting these targets and selecting a benchmark group allows for tracking performance of your own business goals and keeping an eye on levels achieved in comparable dairy operations. DairyTrack provides our clients with the most comprehensive insight into the performance measures of their dairy and helps them make the best decisions for their success.

Have you signed up for DairyTrack yet? Your WestGen Genetic Advisor can provide you with a sample of the report and discuss an introductory trial if you're interested in keeping your finger on the pulse of critical aspects of your dairy business!

The 8th Annual WestGen trip to World Dairy Expo is scheduled to take place from October 3-9th. With the final farm visit confirmations being made now, we invite you to consider joining us to explore dairies and sites in Illinois and Eastern Wisconsin before heading to Madison for 3 days at World

Dairy Expo. It's sure to be a special year to attend as

Expo celebrates it's 50th anniversary with a trade show featuring everything dairy, over 2500 head of show cattle competing and numerous elite genetic sales.

For a complete itinerary, please email Kristin Dahl - kdahl@westgen.com

We hope you can join us to
Celebrate 50!

BACTZYME

MANURE TREATMENT

Manure Pit Treatment

Super charge your lagoon with
billions of beneficial bacteria

What does BactZyme do?

It liquefies solid material so it's easier to agitate and pump. It reduces caking on the field and also decreases the formation of odours.

What type of bacteria is BactZyme?

Facultative bacteria that will function under aerobic (oxygen rich) and anerobic (oxygen poor) conditions.

Is BactZyme safe? Yes, BactZyme

is naturally occurring. It's non-pathogenic to humans, animals, wildlife, and plants. It will not cause short or long term detrimental environmental effects.

Do cold temperatures affect BactZyme?

BactZyme will remain active in the lagoon, due to ground temperature, daily inflow, and heat generated by the bacteria. Activity increases with temperature, but you should apply year round to keep up with manure volume.

Why is BactZyme in puck form?

The pucks are pre-portioned and will quickly dissolve completely, making them easy to toss in and eliminating the risk of falling.

So the size of the lagoon doesn't matter?

No. Base your BactZyme dose on the number of cows present.

How often do I apply BactZyme?

Depending on the required dose, apply every week without fail.

How do I know BactZyme is working?

After 1-2 weeks of use, increased biological activity will be noticed: bubbling or foaming will happen on the pit surface.

**Denotes daughters that resulted from her
sire's sampling period.*

With a capitalization of \$5M, the WestGen Endowment Fund is a vehicle to support extension efforts, targeted research, youth development and other special projects that will be of benefit to cattle producers in Western Canada. The fund underscores WestGen's ongoing commitment to its producer members in helping them strengthen today's livestock industry.

New Projects funded in 2016:	
Dairy Innovation Association (EcoDairy) - A fund to provide transportation subsidies to school and community groups for field trips to Bakerview EcoDairy.	\$4,000
East Olds Dairy Farmers - Breakfast on the Dairy Farm.	\$500
Western Canadian Certified Hooftrimmers Association - DTC certificate of competence hoof trimming course	\$ 5,000
North Okanagan Dairy Extension Advisory Committee - A Day on a Dairy Farm (in conjunction with the Breakfast on the Farm).	\$ 2,000
Delta Farmland & Wildlife Trust - Day at the Farm agricultural awareness event.	\$1,500
North Okanagan Holstein Club - North Okanagan Holstein Club Youth Program 2016	\$ 2,500
BC Angus Association / Meghan McGillivray - Beef It Up.!	\$ 1,000
